

To whom it may Concern,

It is my pleasure to write a letter in support for the Albie House Program.

*The Country Women's Association in Tasmania (Inc.) State President Mrs. Marion Spaulding* is acutely aware of the need to address the high levels of suicide and mental health issues among our youth in Tasmania and the need for a specific youth focussed initiative such as Albie House.

Albie House will deliver suicide intervention on a 24/7 basis including short term crisis accommodation and ongoing non clinical care and support for young people with Key Workers connecting with all and every young person.

I fully support the efforts of Albie House as they seek external funding to establish a program tailored to the needs of young people in crisis.

I believe Albie House will help create a safer, healthier and more inclusive community for young people struggling with mental health and suicidality.

I wish Albie House every success in attaining funding and commencing this invaluable program for Tasmania's youth.

Mrs. Marion Spaulding

State President of CWA
